

Uncle Bob Sez

Most rural communities like to engage in two past-times—order from catalogues and take part in the do-it-yourself plan. The Appliance & Service Center has come up with a heating that is designed for this purpose. First, our price on a five room heating system, oil fired, is more economically priced than the catalogues and secondly, you can install it yourself. Just bring your money in to the Appliance & Service Center and our engineering department will engineer the heat loss of your home, room for room, and we will return to you free of charge a complete engineered installation when you buy your heating system from us. Yes, again we say our price is more economical than the catalogue houses. We will be too happy to show you how you can save and also arrange to finance your heating system over 12 months at only 5% interest on some improvement plan. Start the season by getting your heating system started now. If you have any problems our man will be too happy to help you back on the right track. The Appliance & Service Center invites you to compare our prices with those of other heating installers. Oh, yes, you can have the world famous Waterman Economy heating unit at the low price of \$519.95 complete with blower, filter, fuel gauge, 112,000 BTU unit and complete duct work piping for the complete job. You can get coal, oil or gas fired at a price that will surprise you. We would like you to shop around a bit first and then compare our unusual low price of do-it-yourself heating systems. The same

Morning worship—10:30 a. m.
